AIA Course Summary: Concrete Coloring & Sealing Systems
Sundek Products: CES Provider number 403106166

About This Course:

In this presentation we will cover all types of coloring systems for concrete and overlay installations. We will discuss concrete sealing systems and maintenance. The learner will understand how to choose and specify the proper coloring system for concrete projects. We will also discuss urban heat island effect, high value SRI colors and various industry resources.

Learning Objectives:

The learner will understand what type of coloring systems are used for concrete.

The learner will understand the different types of sealing systems for concrete.

The learner will understand practical applications for concrete colorants.

The learner will understand how to select a coloring system.

The learner will understand how texture effects color.

The learner will understand typical concrete sealing systems.

The learner will understand maintenance for colored concrete flatwork.

The learner will understand maintenance for urban heat island effect.

The learner will understand sustainability and LEED point contributions

The learner will understand industry standards and resources.
