SunBurn Burnishable Solid Stain

STONE GRAY

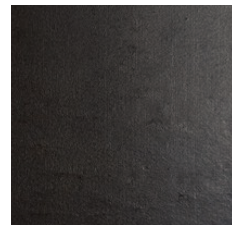

CHOCOLATE

WHITE

SIENNA

BLACK

The colors above represent two to three coats applied on typical gray concrete. Coloration is translucent and will highlight concrete color and texture variation. The Burnishable Solid Stain is much less translucent; however, will also vary with the concrete color and texture variation. Additional coats will provide more color and hide imperfections. The colors on this chart are representations only and attempt to approximate the final appearance of colored concrete. It is strongly advised that the selection of color is made from a sample prior to installation.
