

SunMetal

FEATURES & BENEFITS

DESCRIPTION

SunMetal is used in combination with SunEpoxy 100, SunOne Polyaspartic or the complete line of Sundek acrylic sealers. SunMetal provides a smooth, one-of-a-kind look resembling that of moon craters or a lava lamp. The 3D effect caused by the metallics will provide the custom flooring solution with a real WOW factor.

SunMetal Metallic Pearl Pigments are used with SunEpoxy 100, SunOne, or the complete line of Sundek acrylic sealers.

FEATURES & BENEFITS

- Unique flooring solution for interior commercial or residential projects
- Seamless, monolithic floor with a smooth, glass-like finish
- Withstands a wide range of elements including oils, fats, and chemicals
- Wide array of economical resinous flooring options
- SunMetal is offered in 12 metallic pearl pigments
- Low odor and low volatile organics (VOC)
