

# SunDye

## FEATURES & BENEFITS

### DESCRIPTION

SunStain SunDye is a liquid that is soluble in acetone, water (interior), or denatured alcohol (exterior). It can be used along with SunAcid or as a stand-alone coloring system. SunDye provides a fast-drying and economical way to color interior and exterior concrete. SunDye's ease of application, the vibrancy of color, and quick drying time make it a popular choice to enhance concrete.

**SunDye is installed by spraying the stain of choice with a pump-up sprayer over the plain concrete or decorative concrete surface.**

### FEATURES & BENEFITS

- Ability to enhance the look by adding multiple layers of color
- Can be used along with SunAcid or SunH2O, or as a stand-alone staining system
- When used with water/denatured alcohol it provides more color variation
- When used with acetone it gives a darker monotone look
- Recommended for interior concrete applications
- Slip resistant agents may be added for safety
