

SunColor

*Put a little
color back into
your property*

DESCRIPTION

SunColor is as simple a process as its name suggests... brighten your property with a little color!

Sundek water-based acrylic finish coat can be applied over bare, colored or stained concrete to give it a fresh new look.

SunColor properties make it durable and easy to maintain saving you time and money now and for years to come.

Sundek Effects such as Custom Scoreline, Aggregate Effects and Masonry Effects can be added to further enhance a projects appeal and is ideal for high-traffic concrete areas.

Sundek Products Needed

- **Sundek Undercoat**
- **Sundek Finish Coat**
- **Sundek Clear (optional)**

Product Description

Sundek Undercoat – A low solids water base cross link epoxy.

Sundek Finish Coat – An acrylic water base low solids color dispersion.

Sundek Clear – An acrylic water base sealer (20% solids)

Application Instructions

Clean and etch concrete with a floor machine. Surface may also be diamond ground followed by pressure washing. Squeegee excess water and allow drying until there are no visible signs of water. Apply a primer if needed. Perform all necessary repairs and after surface dries, vacuum or blow any loose sand from surface, then proceed to Finish Coat application. Spray Finish coat through out entire surface. After the finish coat is completely dry. If requested, apply Sundek clear coat for extra protection.
