

SunStain SunDye Exterior

A solvent based stain, for concrete or overlay surfaces

DESCRIPTION

SunDye exterior is a liquid that is soluble in denatured alcohol or acetone. It could be used along with SunAcid or as a stand alone coloring system. SunDye Exterior provides a fast drying and economical way to color interior concrete.

When SunDye Exterior is used with denatured alcohol, it provides more color variation appearance, as opposed when it is used with acetone that gives a monotone darker look.

Sundek Products Needed

- SunDye
- Sundek Crystal Clear

Product Description

SunDye Exterior – Liquid dye that can be mixed either with denatured alcohol or acetone.

Sundek Crystal Clear – A one part urethane solvent base sealer (30% solids)

Application Instructions

Clean surface by power washing and removing all contaminants. Allow drying until there are no visible signs of water or moisture. Slab and ambient temperature above 45 °F and rising, staying above at least 2 hours. Mix SunDye Exterior color pack to 1 gal of either denatured alcohol or acetone. Apply SunDye Exterior through out surface by spraying with a solvent resistant pump up sprayer. When completely dry, apply Crystal Clear. Slip resistance agents may be added for safety.
