

SunStain SunDye

A water or solvent soluble Dye for concrete or overlay surfaces on interior projects

DESCRIPTION

SunDye is a liquid that is soluble in water or acetone. It could be used along with SunAcid or as a stand alone coloring system. SunDye provides a fast drying and economical way to color interior concrete. When SunDye is used with water, it provides more color variation appearance, as opposed when it is used with acetone that gives a monotone darker look.

Sundek Products Needed

- SunDye
- Sundek Crystal Clear

Product Description

SunDye – Liquid dye that can be mixed either with water or acetone.

Sundek Crystal Clear – A one part urethane solvent base sealer (30% solids)

Application Instructions

Clean surface by power washing and removing all contaminants. Allow drying until there are no visible signs of water or moisture. Apply SunDye throughout surface. Slab and ambient temperature above 45 °F and rising, staying above at least 2 hours. When completely dry, apply Crystal Clear. Slip resistance agents may be added for safety.
