

SunStamp

FEATURES & BENEFITS

DESCRIPTION

SunStamp is a versatile, custom-designed stampable cementitious overlay that combines "Old World" elegance with "New World" technology. This system allows infinite creative looks through a variety of stamps, templates, and freeform carving. SunStamp can create the look of flagstone, tile, wood, custom slate, brick, or any other design you desire.

SunStamp is installed by Sundek trained artisans, typically troweled or squeegeed over concrete then a stamp mat is used to create the texture.

FEATURES & BENEFITS

- A variety of designs available with different stamp mats
- Can be applied over concrete, stucco, drywall, brick, and other surfaces
- Ability to customize the look by incorporating a design
- Coloring options include stains, acrylic finish coats, and colored oxides
- Get the look of stone, brick, or wood without tearing out existing concrete
- Infinite combination of patterns and colors
