

SunBurn

Burnishable Stain (interior & exterior)

Transcending Modern Concrete

Sundek's Burnishable Stain (SunBurn) combines the durable, sophisticated finish and low maintenance of concrete flooring with the charisma of stained concrete giving this system the best from both worlds! It's crisp, easy to maintain, saving you both time & money in the long run. Processes available for indoor & outdoor with a UV stable color agent to maintain the depth of color for years to come.

Before

After

HOW IS IT DONE?

Interior Process

- Surface is prepared with a minimum of 2 passes using gradually finer diamond pads on the burnisher.
- Spray apply and scrub into concrete
- After waiting up to 60 mins for it to dry thoroughly, perform another pass with the burnisher
- Repeat the coloring & burnish process 1 to 2 more times until the desired coloring is achieved.
- Apply SunGuard Burnish Guard light penetrating sealer to enhance the sheen.

Exterior Process

- Surface is prepared with a maximum of 2 passes using gradually finer diamond pads on the burnisher.
- Spray apply and scrub into concrete
- After waiting up to 60 mins for it to dry thoroughly, apply another coat of color if needed.
- Apply SunGuard Burnish Guard light penetrating sealer to enhance the sheen.
