

Aggregate Effects

Aggregate Effects are the result of spraying multiple speckles of different colors to emulate the look of washed aggregate concrete. This effect helps camouflage the SUNDEK surface from the outdoor elements & adds character.

Aggregate Effects can be applied over our SUNDEK Classic Texture, SunSplash, SunSand, and SunColor systems.

Masonry Patterns

Masonry patterns incorporate a brick, stone or tile pattern into any of our decorative concrete overlays. Personalize your project further by selecting a pattern to bring your SUNDEK masterpiece to the next level.

Custom Designs

We are able to incorporate a custom design or logo into your SUNDEK to help elevate your style & vision.

We are your single point of contact for all your concrete resurfacing, design expertise and restoration needs.

Custom Scoreline

SUNDEK has a great solution to incorporate your existing concrete cracks into a custom scored pattern, Custom Scoreline Effect.
