

Stamp Rehab

SunRestore Stamp Concrete Rehab

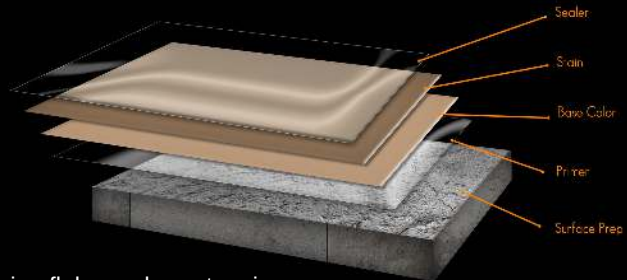

**Taking Existing Battered Stamped Concrete
Back to Beautiful!**

SunRestore Stamp Concrete Rehab is a system providing a complete "make-over" for stamped concrete. From simple color enhancements & resealing to repairs with major rehabilitation.

The end result is new, updated & impressive!

HOW IS IT DONE?

Minor Rehab Indoors

- Surface is prepared, removing flaky sealer or topping, & deglossing surface
- Clean the surface thoroughly
- Spray apply colored SunEpoxy (colored to customer desires)
- Stain or Dye to meet the customer design requirements
- Apply EcoClear or Finish Coat Clear

Minor Rehab Outdoors

- Surface is prepared by sanding or acid wash
- Clean the surface thoroughly
- Spray apply colorant (Oxides, Stains or Dyes)
- Adjust coloration to meet customer approval

Major Rehab

- Surface is prepared by sanding, grinding or acid wash
- Any required surface repairs are made
- Clean the surface thoroughly
- Prime the surface with SunEpoxy 54 or 400
- Spray apply a new color base with Sundek Finish Coat
- Stain or Dye to meet the customer design requirements
- Seal with Sundek Finish Coat Clear or upgrade to EcoClear
